

November 9<sup>th</sup> Meeting notes:

Each town will be providing a list of volunteer organizations in their communities for us to consider for POD volunteers.

I have attached the closed pod documents for your review. As discussed yesterday we loosely defined our potential closed pod locations. WE are looking for a list right now of the facility name, location, reason for closed pod designation (type of resident). The more obvious list of closed pods is as follows:

Correctional facility (County only as the state covers the state buildings and departments)  
schools with resident students  
nursing homes  
group homes of any sort (Diane provided an email this am regarding the transitional housing status with privatization).  
Large employers

I think we all agreed that there are extenuating circumstances that may lead to a town putting a site on the list-go ahead and do it and then we will talk about it.

Once you have put your list together (please have it no later than Friday 11/25) please send it to me so I can compile a master list for the group to consider at our next meeting **MONDAY 11/28 at 0900 at NHTI.**

Leigh will be speaking to CRVNA about their patients in the community and how we will collaborate on that population.

Leigh will also be sending the first responder information along before the next meeting.

Mike will speak with CFD to see if we can get someone to participate in the POD planning.
